Mob-IO is a mobile application that helps user to safely deliver information and reports from their business data centers straight on their smartphone or tablet. All they need is a smartphone/tablet running and a few minutes to set up your environment. And it is as easy as it sounds!

Thanks to Mob-IO, everything happens NOW, not “when I get at work ”! In this way, you will not miss important business opportunities anymore and you will be able to use your time, information and financial resources efficiently.

SOLUTION MODULES

The solution is configured on three modules (administration, configuration and smartphone) with user friendly interfaces and tools.

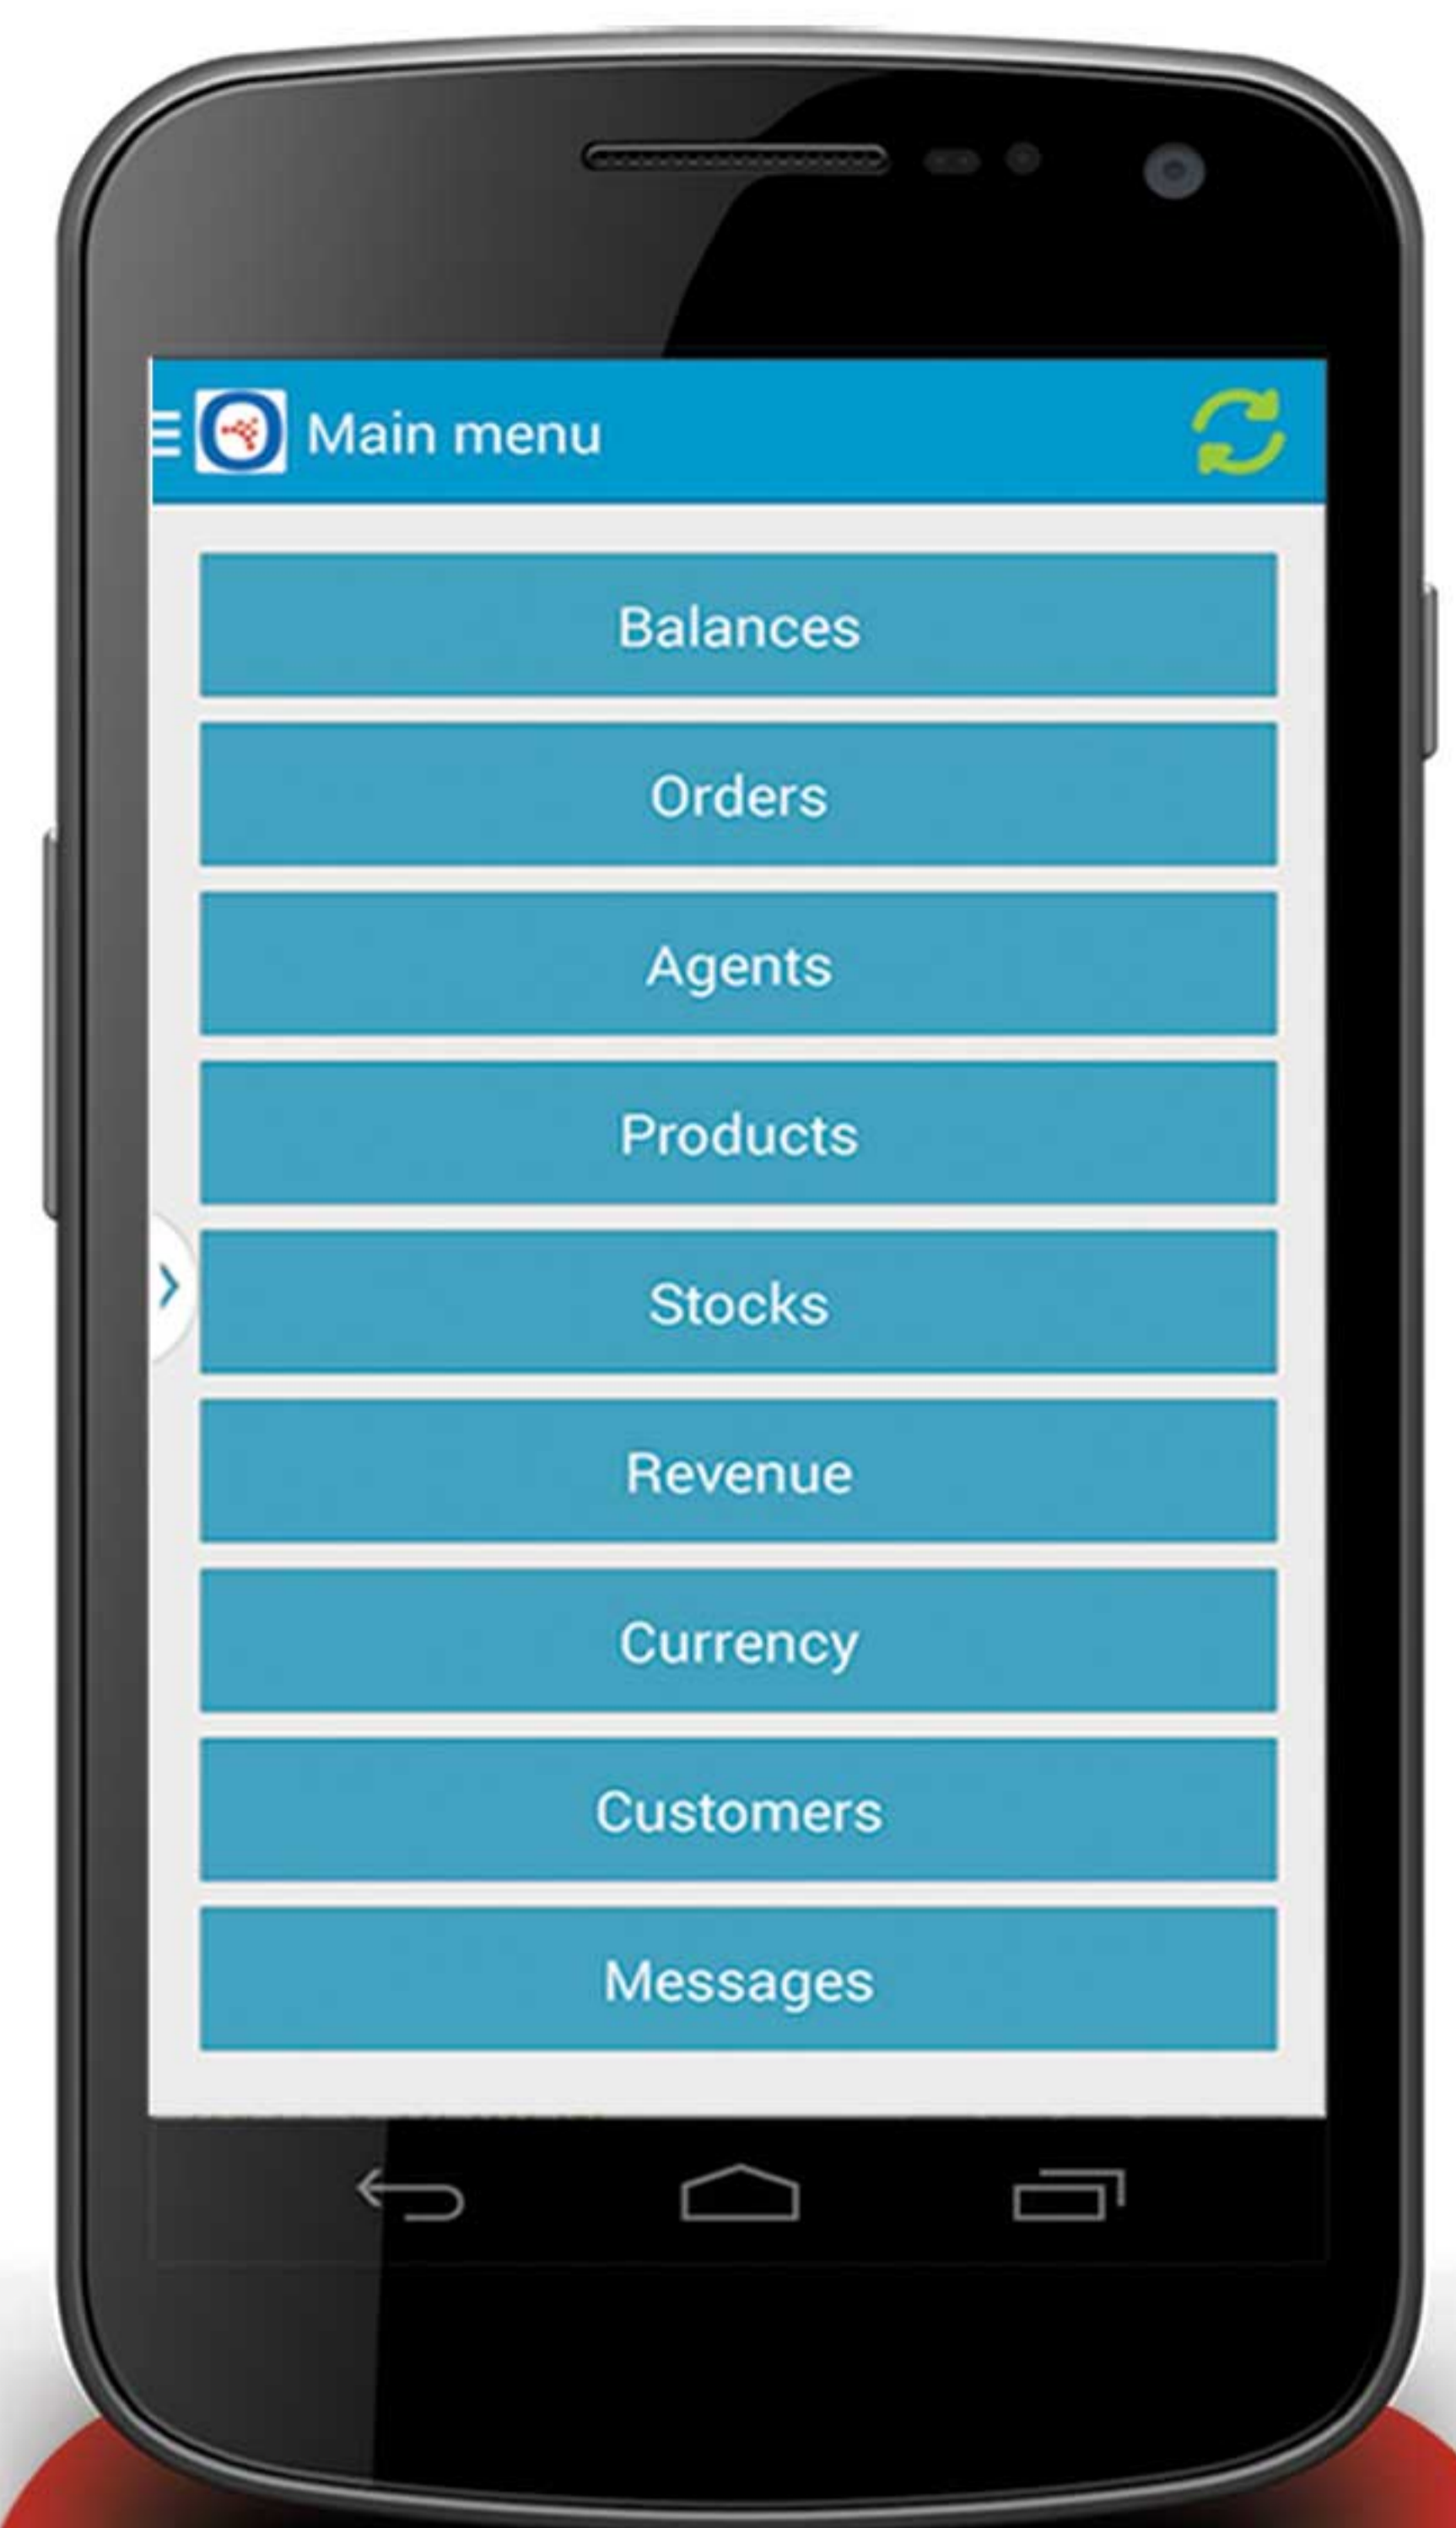

MobAdmin administration module

- ✓ Creating users
- ✓ Assigning rights to applications for each user created
- ✓ Defining accesses to databases

MobStudio configuration module

- ✓ Creating interfaces for each application with drag & drop
- ✓ Linking information from databases to interface elements (labels, buttons, lists, combo boxes, graphs)

Mob-IO smartphone module

- ✓ Custom mobile application
- ✓ Real time secure access to information in the databases, as reports, graphs, KPI (key performance indicators)

SOLUTION ADVANTAGES AND ITS BENEFITS TO USERS

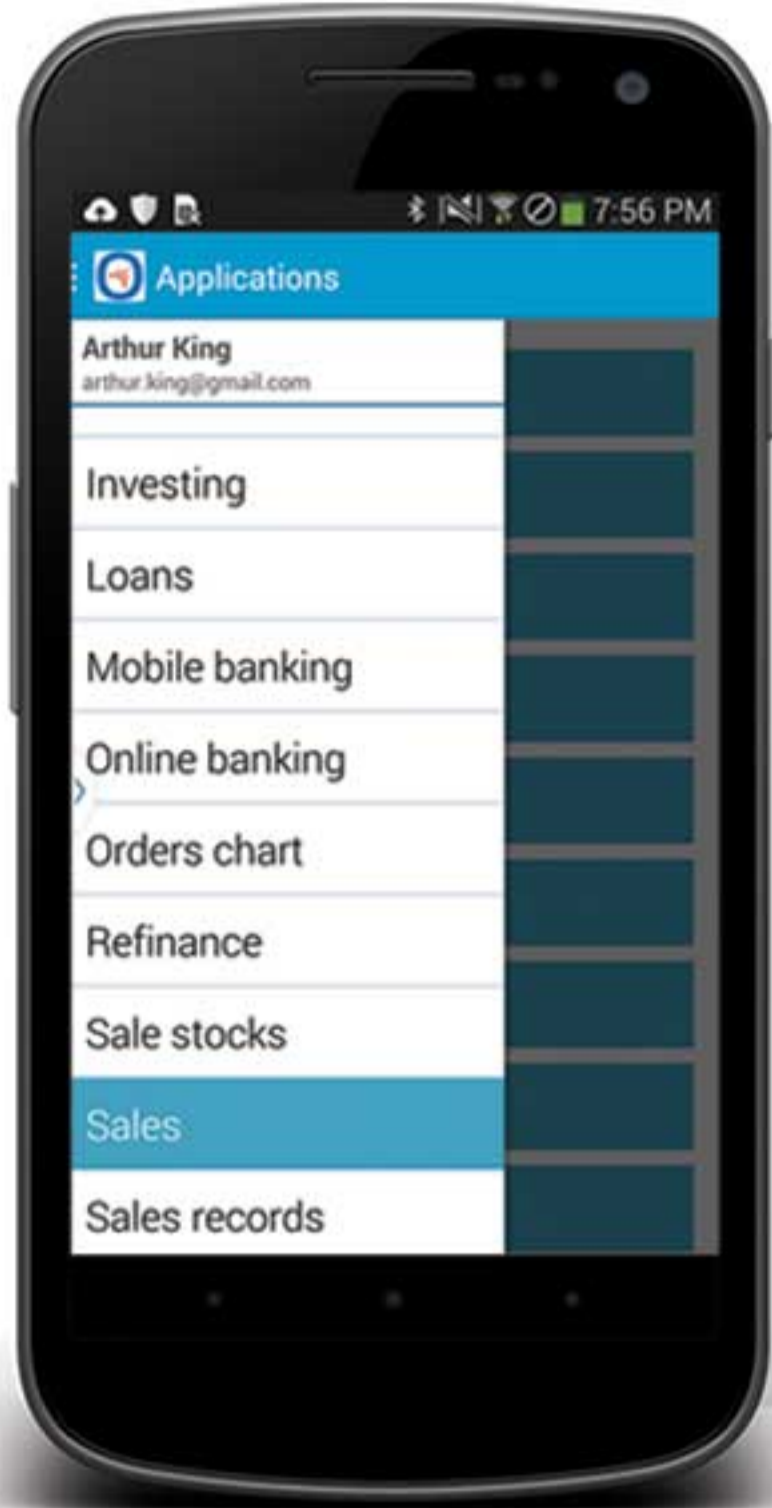

Mob-IO is a mobile reporting solution that allows you to: **cut costs, increase profit and streamline the business processes in your organization**, but most important to connect you to the benefits involved by the mobility and speed age, by offering centralized and customizable remote mobile access to your information resources.

No matter the industry or size of your business, any smartphone user can benefit from Mob-IO; with a lot of benefits, thanks to the advantages that the solution offers:

- an **extremely friendly application** both for user and IT responsible, thanks to accessible use and implementation;
- **time and cost savings** at all the procedural levels;
- extremely **easy integration** with IT devices;
- the application is **installed and configured in the control panel** (presence in locations in which the systems or servers are not required anymore);
- **works on any internet line with a very low traffic and high upload speed** (by means of this application the problem of opening many ports to access information disappears);
- support for **various DBMS**: Microsoft SQL, ORACLE, MySQL, PostgreSQL, Paradox and other, on demand;
- the **information security** is maximized.

APPLICABILITY AREAS OF THE SOLUTION

Whether you are a sales representative in a company and urgently need access to stocks, prices and details of products or a store owner and want to see a statement of revenue in your company accounting software to make payments to a specific supplier or a manager in a multinational company and you need immediate access to business reports on a server located thousands of miles away, **Mob-IO allows, facilitates and speeds up access to data you need, regardless of their nature.**
